

## SPOTLIGHT

### Boosting scale of clean technology and unlocking climate finance vital ahead of COP28, says ADSW 2023 report

Climate change can be tackled by embracing clean energy systems, unlocking economic development, unleashing the power of innovation and including marginalized voices, according to a wide-ranging report summarizing key findings from ADSW 2023.

The report titled, 'United on Climate Action towards COP28' argues that concerted action is vital ahead of the global climate summit.

## EXPERT INSIGHT

### Women can play a vital role in designing solutions to address climate change

**HE Razan Khalifa Al Mubarak**, UN Climate Change High-Level Champion for the COP28 Presidency and International Union for Conservation of Nature President, provides insights on the vital role women can play in designing solutions to address climate change.

In a discussion titled 'Women as Agents of Transformational Change: Diversity, Disruption, and Diplomacy' in the WiSER Wisdom Series, she emphasizes the importance of diversity and the ability of leaders to inspire other women to greater participation in sustainability.

She draws a striking parallel between the most successful biodiverse systems and the performance of organizations that have become more diverse and inclusive.
